# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference LPB/P32058WO	FOR FURTHER ACTIO	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)						
International application No.	International filing date (day/m	onth/year) Priority date (day/month/year)						
PCT/GB00/03543	15/09/2000	17/09/1999						
International Patent Classification C12N15/00	n (IPC) or national classification and IPC							
Applicant								
UNIVERSITY OF LEEDS et al.								
<ol> <li>This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.</li> </ol>								
2. This REPORT consists of a total of 7 sheets, including this cover sheet.								
This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT). These annexes consist of a total of 5 sheets.								
3. This report contains indications relating to the following items:  I ☒ Basis of the report								
II ⊠ Priority								
		inventive step and industrial applicability						
IV ☐ Lack of unity								
	V Peasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations suporting such statement							
VI 🖾 Certain docu	uments cited							
1	cts in the international application							
VIII ⊠ Certain obse	rvations on the international application							
Date of submission of the demand	Date	of completion of this report						
09/04/2001	29.	1.2001						
Name and mailing address of the preliminary examining authority:	international Auti	orized officer

ı.	Bas	Basis of the report							
1.	the and	With regard to the <b>elements</b> of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)): Description, pages:							
	1-3,	5-17	as originally filed						
	4		as received on	03/10/2001	with letter of	03/10/2001			
	Cla	ims, No.:							
	1-2	1	as received on	03/10/2001	with letter of	03/10/2001			
	Dra	wings, sheets:							
	1/4-	-4/4	as originally filed						
	Seq	uence listing par	t of the description, pages:						
	1-3,	1-3, filed with the letter of 04.12.00							
2.		With regard to the <b>language</b> , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.							
Th	The	ese elements were available or furnished to this Authority in the following language: , which is:							
		the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).							
		the language of publication of the international application (under Rule 48.3(b)).							
		the language of a 55.2 and/or 55.3).	translation furnished for the pur	poses of inter	national preliminary ex	kamination (under Rule			
3.		-	cleotide and/or amino acid sec ry examination was carried out o	·		l application, the			
		contained in the ir	nternational application in writter	ı form.					
		filed together with	the international application in o	computer read	lable form.

listing has been furnished.

4.	The	The amendments have resulted in the cancellation of:						
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):						
		(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)						
6.	Additional observations, if necessary:							
II.	Pric	ority						
1.	This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:							
		□ copy of the earlier application whose priority has been claimed.						
	☐ translation of the earlier application whose priority has been claimed.							
2.		This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid.						
		Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.						
3.	Additional observations, if necessary: see separate sheet							
٧.		soned statement un tions and explanatio			rith regard to novelty, inventive step or industrial applicability;			
1.	Stat	ement

	Inve	entive step (IS)	Yes: No:	Claims Claims	1-13, 15-21 14			
	Indu	ustrial applicability (IA)	Yes: No:	Claims Claims	1-21			

2. Citations and explanations see separate sheet

### VI. Certain documents cited

1. Certain published documents (Rule 70.10)

and / or

2. Non-written disclosures (Rule 70.9)

see separate sheet

## VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted: see separate sheet

### VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: see separate sheet

### **EXAMINATION REPORT - SEPARATE SHEET**

#### Cit d docum nts 1.

The following documents (D) are referred to in this communication; the numbering is the same as in the search report and will be adhered to in the rest of the procedure:

- D1: PEREDELCHUK M Y ET AL: 'A method for construction of E. coli strains with multiple DNA insertions in the chromosome' GENE: AN INTERNATIONAL JOURNAL ON GENES AND GENOMES, GB, ELSEVIER SCIENCE PUBLISHERS, BARKING, vol. 187, no. 2, 18 March 1997 (1997-03-18), p. 231-8, ISSN: 0378-1119
- D4: ZUBKO ELENA ET AL: 'Intrachromosomal recombination between attP regions as a tool to remove selectable marker genes from tobacco transgenes.' NATURE BIOTECHNOLOGY, vol. 18, no. 4, April 2000 (2000-04), p.442-5, ISSN: 1087-0156

#### 2. Re Item II

### **Priority**

2.1. The priority has been checked: the descriptions of the priority document and of the application as filed appear to have the same content. Thus, the priority is valid and it is assumed that all the claims enjoy the claimed priority date. Therefore, document D4 has not been considered to be part of the prior art as defined in the regulations (Rule 64(1)-(3) PCT).

#### 3. Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventiv step or industrial applicability; citations and explanations supporting such statement

3.1. Claims 1-12 are directed to a method of removing part of a transgene after its integration into a genome by intrachromosomal homologous recombination in the attachment P region (attP) comprising seq. ID no 1, whereby the use of the attP region yields a high frequency of intrachromosomal homologous recombination. D1 describes a system wherein a gene of interest and a resistance gene are integrated into a host by recombination using modules of site specific recombination of Tn1545 and phage λ. The resistance gene is flanked by λattR and hattL sites and can be excised after integration into the host genome by a

helper phage which bears the necessary phage proteins λxis and λint (p.232, Fig.1 and p.236, § 3.3).

Since the recombinant \( \text{\text{attL}} \) and \( \text{\text{\text{attR}}} \) sites comprise parts of the attP region but nevertheless differ from the attP sequence of claim 1 and since no other prior art teaches a method with the technical features of claim 1, the subject-matter of claim 1 and dependent claims 2-11 is novel over the prior art (Art. 33(2) PCT). Consequently, claims 12, 13 and 15-21 directed to plants or plant cells produced by the method of claim 1 or containing a transgene flanked by said specific attP region and related methods are also novel (Art. 33(2) PCT).

3.2. Claim 14 is directed to a plant or plant cell comprising recombinant attP regions without further specification of the sequence of said regions. Since the plant cells obtained in D1 contain recombinant sites that do actually comprise parts of the attP region, the teaching of D1 is novelty destroying to the subject-matter of claim 14 (Art. 33(2) PCT).

3.3. Claim 1 differs from D1 in that the fragment to excise by intrachromosomal

- homologous recombination is flanked by specific attP sequences comprising seq. ID no 1 of bacteriophage  $\lambda$ , whereas in D1 the fragment (i.e. the drug resistance gene) is flanked by λattL and λattR sites. The method claimed appears to be an alternative method to the method of D1. However, neither D1 nor any other document of the prior art suggests the use of said specific attP region. Moreover, the applicants show that the method claimed leads to a more efficient removal of the transgene due to a higher recombination frequency between said attP regions and without the need of helper sequences. Hence, the method of claim 1 could not be derived in an obvious manner from the prior art and represents a technical improvement over already known methods. Consequently, the subject-matter of claim 1 and dependent or related claims 2-13 and 15-21 is also inventive (Art. 33(3) PCT).
- 3.4. The subject-matter of claims 1-21 is industrially applicable in the field of food industry (Art. 33(4) PCT).

#### 4. Re Item VI

#### 5. Re Item VII

### Certain defects in the international application

5.1. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1-D3 is not mentioned in the description, nor are these documents identified therein.

#### 6. Re Item VIII

### Certain observations on the international application

6.1. The term "functionally equivalent fragment thereof" used in claim 7 is vague and unclear and leaves the reader in doubt as to the meaning of the technical feature to which it refers, thereby rendering the definition of the subject-matter of said claims unclear (Article 6 PCT).
